PRESS RELEASE

FOR IMMEDIATE RELEASE

Princeton Scientific Corporation Launches New Products for 2026

Princeton Scientific Corporation is excited to announce the launch of its latest innovations in material science and engineering products. These new offerings, available as of January 2026, are designed to meet the demands of researchers, scientists, professors, and industry professionals worldwide.

- **Desktop Coaters:** Enhance your research and production capabilities with our state-of-the-art Desktop Coater. Designed for precision and versatility, it's an essential tool for vacuum coating applications.
- **Plasma Technology:** Our RF plasma generators provide unmatched precision for semiconductor manufacturing and material processing, enabling uniform surface modifications for thin-film deposition and plasma etching.
- **Tensiometers:** Experience cutting-edge smartphone-based technology for surface measurements. Compact and easy to use, our tensiometers deliver peer-reviewed accuracy for contact angle, surface tension, and sliding angle measurements, offering advanced functionality at a competitive price.

Additionally, our newly enhanced website offers a seamless, user-friendly experience with detailed information on all our products, including materials, wire saws, particle beam line diagnostics, and UHV technology. Visitors can easily request a quote for any product they are interested in.

Explore these exciting new products and learn more about how Princeton Scientific Corporation continues to lead in material science innovation.
